

## **BASC MANAGEMENT AND SECURITY CONTROL SYSTEM BOOKLET**

At ISCO, we constantly make every effort to ensure security in our processes. For this reason, we periodically evaluate and control our personnel, resources and information that may be misused, and we keep traceability and records of all our processes. This commitment to security is based on the World BASC Organization standards.

### **WHAT IS BASC?**

BASC is a program of cooperation among business, customs authorities, governmental agencies and international organizations to promote safe practices throughout the supply chain in international trade of goods.

**Business Alliance for Secure Commerce.**

### **WHAT IS THE BASC OBJECTIVE?**

- Promote activities aimed at preventing illegal activities such as smuggling of goods, narcotics and terrorism, in companies.
- Standardize the global supply chain security procedures in companies.

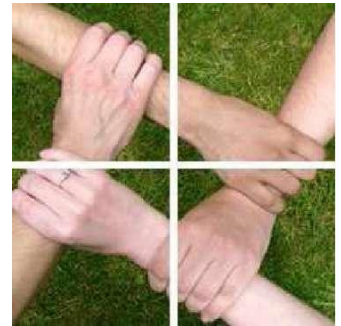

### **WHY IS IT IMPORTANT TO IMPLEMENT BASC CRITERIA?**

- Because it allows securing and facilitating global commerce.
- Because it strengthens the cargo control and monitoring so that the cargo can reach final destination without problems related to criminal acts.
- Because it makes the supply chain faster and more secure, which has allowed reducing drug smuggling and preventing shipments from being contaminated.

## HOW CAN YOU CONTRIBUTE TO THE BASC MANAGEMENT AND SECURITY CONTROL SYSTEM?

- Complying with the security procedures at the loading point.
- Complying with the appropriate inspection and sealing procedures in order to maintain the container and trailer integrity, inspecting empty containers before stuffing and trucks (front wall, left-hand/right-hand side, floor, interior/exterior roof, interior/exterior doors and container's exterior).
- Complying with the appropriate sealing procedure and using high security seals (ISO 17712).
- Complying with the procedures for recognizing and reporting any event of compromised seals to the authorities.

## WHAT ELSE CAN YOU DO TO CONTRIBUTE TO SUPPLY CHAIN SECURITY?

- Note changes in your workmates and friends' conduct and/or unjustified exterior signs of wealth.
- Report any illegal act or suspicion about an illegal act to the authorities.
- Do not allow the improper use of seals and passwords.
- Ensure that confidential information is always protected against access by unauthorized persons.

## WHY MUST YOU HAVE A CERTIFIED BASC MANAGEMENT AND SECURITY CONTROL SYSTEM?

The implementation of a Management and Security Control System gives your organization's processes high standards of security against criminal acts such as smuggling of goods, narcotics and terrorism, which are the main threats to the international supply chain. That is why the adoption of such international standard through BASC certification/approval allows maintaining a faster and more secure supply chain ([www.bascperu.org](http://www.bascperu.org)).
